Subrat Kumar Jena

Bengaluru, Karnataka, India | +91-9090245437 | subratspace@gmail.com | linkedin.com/in/subrat-kumar-jena-3800a610b

PROFESSIONAL SUMMARY

Software Engineer with 5 years of experience building scalable SaaS and enterprise web applications, primarily specializing in React.js/TypeScript frontends (~70% of scope) with hands-on backend experience in Node.js, PostgreSQL, and AWS (~30% of scope). Architected Micro-Frontend systems with Webpack Module Federation, led RBAC authentication and real-time dashboard delivery, and built supporting backend/serverless services on AWS Lambda handling 10K+ concurrent users.

TECHNICAL SKILLS

Frontend: React.js (v16–19), TypeScript, JavaScript, Next.js, HTML5, CSS3

State & Architecture: Redux Toolkit, Context API, React Router, Micro Frontends (Webpack Module Federation)

UI & Styling: Tailwind CSS, Ant Design, Styled-Components, Recharts

Testing: Jest, React Testing Library (RTL)

Backend & APIs: Node.js, Express, RESTful APIs, Axios, Azure MSAL, OAuth 2.0

Databases: PostgreSQL, AWS DynamoDB

Cloud & DevOps: AWS (Lambda, EC2, S3, API Gateway, CloudWatch), Azure

Developer Tools: Git, GitHub Copilot, Postman, VS Code

AI Developer Tools: GitHub Copilot, Replit, Windsurf

PROFESSIONAL EXPERIENCE

Clairvoyant India Pvt. Ltd. (acquired by EXL Services, 2023)

Software Engineer II — *Feb 2021 – Apr 2026*

Project: Enterprise AI Agentic Management Platform (2025 – 2026)

- Led approximately 60–70% of frontend development using React 19, TypeScript, and Tailwind CSS, building a modular component architecture consumed by four platform modules
- Implemented RBAC authentication with Azure MSAL and OAuth 2.0, designing the role-based access model used across both frontend routing and API-level authorization checks
- Built real-time analytics dashboards with Recharts, working closely with backend teams to shape REST API contracts and centralize Axios-based data-fetching and error handling
- Improved Lighthouse performance score from 62 to 88 and reduced bundle size by ~30% through code splitting, memoization, and lazy-loading strategies

Project: SaaS-Based E-Learning & Publication Platform (2023 – 2025)

- Architected a Micro-Frontend system using Webpack Module Federation, decomposing a multi-tenant LMS into independently deployable modules (Course, Exam, Admin) for parallel team development and fault isolation
- Contributed roughly 50–60% of frontend development for the multi-tenant LMS using React.js, TypeScript, Redux Toolkit, and React Router v6, building interfaces for course management, exam workflows, and student performance tracking
- Built admin dashboards with Ant Design and Styled-Components, integrated with REST APIs via Axios for real-time data rendering and reporting
- Contributed to backend services using Node.js, Express, and PostgreSQL on AWS EC2, and used AWS Lambda/S3/CloudWatch for async processing, static assets, and monitoring that helped reduce frontend MTTD by 40% during peak exam periods handling 10K+ concurrent users
- Established a shared component library and PR review standards, reducing new developer onboarding time and lowering the UI bug rate across releases

Project: EdTech Learning Platform (2021 – 2022)

- Built student dashboards, instructor portals, and course workflow interfaces using React.js, Next.js, TypeScript, and REST APIs, as part of a 4-person team on a serverless SaaS platform (AWS Lambda, API Gateway, DynamoDB)
- Collaborated on Node.js Lambda functions alongside backend engineers, contributing full-stack in an agile team
- Integrated the Stripe payment gateway with webhook event handling for recurring subscription billing and automated invoicing, reducing failed payment follow-ups by 60%
- Delivered the MVP two weeks ahead of schedule with zero critical post-launch defects

EDUCATION

B.Tech – Engineering — 2013 – 2017

Indira Gandhi Institute of Technology | CGPA: 7.9 / 10.0

AWARDS & RECOGNITION

- **Reliable Value Award** – Recognized for consistent delivery ownership and cross-functional client collaboration under tight deadlines.
- **Team Player Value Award** – Acknowledged for going above and beyond, mentoring peers, and driving team cohesion on multi-sprint deliverables.
